Rural Telephones

Mr. Farmer: Make your home as modern for your family as a city residence, and place yours in a position to get the latest market quotations at a time. This can be accomplished by means of our telephone service, which is a service that your neighbor can get for a sum that is small compared with the benefit it affords. Call or address our nearest office or write direct to headquarters, Nashville, Tennessee. For information regarding our special "Farmers' Line" rate. If at present you are not enjoying telephone service, we can immediately interest you. On lines over the States of Kentucky, Tennessee, Mississippi, Louisiana and the Southern portion of Indiana and Illinois.

Adler's
Collegian
Clothes

These clothes, which are especially designed for the young, nobby dresser, are well deserving of the universal reputation they have gained. They are recognized in every style center of America as the most perfect clothes this country produces, and we have so much confidence in their quality and in their style, that we strongly recommend them to our customers. If you have not bought your Fall garments, let us show you these exceptional clothes. By coming into the store you are by no means obligated to make a purchase. You will find our courteous salesmen ready and willing to show you these new fashions and let you try on your size. You will find no urging to buy. We want you to wear ADLER'S COLLEGIAN CLOTHES, because we know they will satisfy you better than any other garments we know of, but we want you to be the sole judge.

[This matter must not be repeated without special permission.]

SOME TUBERCULOSIS STATISTICS

Probably no state in the Union has made a more determined or more successful warfare on bovine tuberculosis than Wisconsin, and some figures which have been lately published relative to this campaign are interesting and should be of profitable study to all in other sections. The educational campaign has been conducted by means of addresses, printed leaflets and post-mortem demonstrations given in co-operation with the state live stock sanitary board. Since the tuberculin test was first applied, in 1902, 72,638 animals have been tested, over 65,000 of this number coming within the past three years. The state has paid the owners two-thirds of the appraised value of reacting animals, receiving in return whatever was paid for the carcasses of those animals passed by the federal inspectors. There has been a decrease in the per cent of reacting animals from 17.7 per cent in 1906 to 5.6 per cent in 1908. In 1909 almost half the herds which were tested were found infected, while in 1908 less than one-fourth had the disease. In 1908 12 per cent of the animals tested were found to be infected, and in 1908 less than 4 per cent. The data which the station officials have gathered shows that the most common method of herd infection is through the purchase of diseased animals, 263 out of 263 herds found infected in 1908 being infected through purchase. A law requiring a clean bill of health with each animal sold is strongly urged, as is also legislation requiring the pasteurization of factory by-products.

THE FOLLY OF TEMPORIZING.

It is that there are not more farm papers of the type of a few which might be named which have looked the situation touching bovine tuberculosis through to the end and have uncompromisingly in season and out of season advocated a thorough testing of affected herds and the eradication of all animals found diseased. One of these papers is *Boards Dairyman*, printed at Fort Atkinson, Wis., and the service which it has performed for the dairy interests of that and adjoining states can hardly be estimated. These papers which have followed a temporizing policy—opposed the testing of dairy herds because the immediate loss to the owners seemed heavy—have caused dairymen who have followed this advice tremendous loss in the long run, as laws which prevent the sale of milk from diseased cows have been passed in many states, while the job of getting rid of diseased animals and building it up again on a new basis is one that requires much time and attention. The rest of the agricultural papers should agree over to the other side of the house in this vital matter.

PRACTICAL CO-OPERATION.

A number of farmers living near Rogers, in Hennepin county, Minn., have according to a farm paper published at the Twin Cities, put into practice this year a most commendable type of co-operation. It has consisted simply in getting their herds together and agreeing to plant a single variety of potatoes for their field crop, with the thought in view that with a large quantity of potatoes raised buyers would come and offer a good price for the crop. This extended a good deal of pains in the growing and care of their spud crop, and their hopes have been fully realized. The tubers yielded on the average 175 bushels per acre, were of one variety and of uniform size and quality. The buyers came and paid the growers 40 cents per bushel at the cars, nearly 10 cents more than growers in many other sections received. This idea of co-operation in vegetable and fruit production is very practical and profitable, and its benefits can hardly be too strongly urged.

THE ROUTINE PALLS.

Many a lad leaves the farm for city occupation because of the dull monotonous routine of his work, in the doing of which little effort is made by the farm owner to adopt new or up to date methods which recognize the place of intelligence as well as sheer muscular effort as an important factor in getting work out of the way. There is absolutely no field of endeavor where the application of brains will yield a larger net return than in agriculture, and it's about time a whole lot of fellows who have been content to make a clodhopper occupation of it were rubbing their eyes and awaking to the fact. It can only be "cleverness" to a tribute to agriculture as an occupation that so many who have been engaged in it have been able to make a living and something besides, following as they have such slowly and indifferently methods and applying so small an amount of gray matter to the work they had in hand.

SCOTT & BOWNE, 409 Pearl St., N. Y.

Every human being as so blessed should be thankful for the physical strength wherewith to earn his daily bread and an appetite and stomach which will enable him to enjoy and digest it properly. These are common blessings, yet a good many people are denied them.

In making preparation for the winter food supply for the poultry it is well to keep in mind that both clover and alfalfa are excellent ration in the supplying of needed protein. The hens will devour all leafy parts of the legumes as eagerly as they will wheat or corn.

Linberneck is an ailment which now and then appears in flocks of poultry and seems to be due to a diseased condition of the neck, induced by poisons with each animal sold is strongly urged, as is also legislation requiring the pasteurization of factory by-products.

Carrots, beets and turnips which it may be desired to carry through the winter should be packed in barrels or bins with clean sand or dry earth, enough filler being used to keep the roots separated a bit. The place where such crops are stored should be both cool and dry so as to retard as far as possible the tendency to decay or sprout.

There is no profit and mighty little satisfaction in the end in buying fruit trees of unknown descent and dubious vitality of a foreign house, for prices when the same varieties guaranteed true to name and vigorous can be bought from the nearby nurseryman at more reasonable prices. Before placing orders for future deliveries with the foreign house it would be a good idea to write the nearby house and get prices.

Experiments which have lately been conducted in the bacteriological department of the University of Wisconsin seem to point quite conclusively to the fact that a good many cases of poisoning from the eating of ice cream are traceable to the keeping of the cream from which it is made for some length in cold storage, during which interval poisons are developed by harmful bacteria, whose work is not discernible from either texture or taste.

The apple crop of America—United States and Canada—placed 35,000,000 barrels, which is 12,000,000 barrels more than that of 1908. It is generally conceded that the crop produced east of the Mississippi river is in complete cold storage, it being easy to retard the growth and blossoming of the plants in the spring by simply leaving the covering on.

Smokeless

Until science discovered a way to construct the Automatic Smokeless Device, and make it completely dependable, all oil heaters had one common great fault—smoke.

With the advent of the Automatic Smokeless Device, and its practical application to the

PERFECTION Oil Heater
(Equipped with Smokeless Device)

the smoke problem was successfully solved.

The Perfection Oil Heater is the only heater equipped with this

Automatic Smokeless Device

which insures a steady, full-glowing heat, with the wick turned up as high as it will go without a shroud of smoke. Reverse the motion, turn the wick down—there's no odor. The smokeless device automatically locks and prevents the upward movement of the wick beyond the proper exposure. This is the secret. This splendid result gives leadership to the Perfection.

You may now have all the heat you want—when you want it—and where you want it—without the annoyance of smoke or odor.

Brass foot holds 4 quarts of oil, which permits a glowing heat for 9 hours. The Perfection is beautifully finished in Nickel or Japan.

That Lame Back Means

Kidney Disease

And to Relieve the Lame and Aching Back, You Must First Relieve the Kidneys

There is no question about that at all—for the lame and aching back is caused by a diseased condition of the kidneys and bladder. It is only common sense, any way—that you must cure a condition by removing the cause of the condition. And lame and aching back are not by any means the only symptoms of degeneration of the kidneys and bladder. There are a multitude of well-known and unmistakable indications of a more or less dangerous condition. Some of these are, for instance: Extreme and unnatural lassitude and weakness, nervous irritability, heart irregularity, "nerves on edge," sleeplessness and inability to secure rest, scalding sensation and sediment in the urine, inflammation of the bladder and passages, etc.

DeWitt's Kidney and Bladder Pills are an exceptionally meritorious remedy for any and all affections or diseased conditions of these organs. These Pills operate directly and promptly—and their beneficial results are at once felt.

They regulate, purify, and effectively heal and restore the kidneys, bladder and liver, to perfect and healthy condition—even in some of the most advanced cases.

Woman's Beauty

Some women retain their beauty to an advanced age. But women, who regularly endure pain, age rapidly, for suffering leaves its lasting marks on them.

Nearly all women suffer more or less with some form of female trouble. It should not be neglected. Avoid the pain—treat yourself at home by taking Cardui, as thousands of other women have done. Begin at once and give Cardui a fair trial.

TAKE CARDUI

It Will Help You

Mrs. Katie Burlison, Goreville, Ill., tried Cardui and writes: "I suffered with female troubles, and was so sick I could not stand on my feet. Finally I began to take Cardui, and soon began to mend. Now I am able to do all my household work and am in much better health than I was before." Try it.
